

L Sealer Shrink Wrap Machine

Model:V'L1

The VM Pack L Sealer Shrink Wrapping Machine offers reliable and consistent performance with its durable and long lasting sealing bar, minimizing downtime due to spare parts and service interruptions during packaging operations. The system is available in two variants: semi automatic l sealer shrink wrapping machine and automatic l sealer shrink wrapping machine.

The VM Pack semi automatic l sealer with shrink tunnel enables operators to easily adjust packaging settings according to production requirements. Its elevator type conveyor system allows for height adjustments, ensuring that higher products are packaged properly. For detailed technical information, model selection, or pricing inquiries, please contact us.

Feature	Description
Semi Automatic L-Sealing Bar	The semi automatic hot sealing bar provides cutting and sealing of the shrink film.
Automatic Sealing Mode or Button Operation	In automatic sealing mode, the sealing process is performed at operator defined time intervals without the need to press a button.
Elevator Conveyor System	Allows height adjustments for packaging higher items with ease and precision.
Adjustable Speed	Conveyor speed is adjustable based on product flow.
Time Setting	Time settings can be easily adjusted.
Temperature Control	Adjustable temperature settings.
Adjustable Product Table	Adjustable to product dimensions.
Machine Material	The machine body is manufactured from steel construction and protected with electrostatic powder coating.

Warranty	1-year product warranty and 5-year spare parts availability.
CE Compliance	Machine is designed in compliance with CE mechanical and electrical safety directives.
Max Product Dimensions	(W) 410 mm x (L) 550 mm x (H) 200 mm
Max Speed	10–15 packs/min
Packaging Film	7–19 micron (POF), 35–50 micron (PE), PVC
Roll Width	650 mm
Air Pressure	6 Bar
Voltage	380V, 50/60Hz
