

Sleeve Wrapping Machine

Model: V'M1

The VM Pack Sleeve Wrapper Shrink Machine is an ideal solution for medium scale operations. Designed to work with polyethylene (PE) shrink film, the system is suitable for packaging both individual and multi product bundles efficiently and securely.

The motorized pusher unit ensures the bundled products are transferred to the sealing area without tipping and scattering. Its monoblock chassis ensures a compact design, space saving use in production environments. For detailed technical information, model selection, or pricing inquiries, please contact us.

Feature	Description
Motorized Pusher Unit	It pushes the products to the sealing area.
Color Touch Screen Control Panel	User friendly interface allows for quick and easy adjustment of the machine settings.
Product Counter	Counts the total number of packages produced during operation.
Motorized Film Unwinding	Automatically unwinds the shrink film from the roll during operation. Speed is adjustable via drive control.
Machine Material	The machine body is manufactured from steel construction and protected with electrostatic powder coating.
Warranty	1-year warranty, with 5-year spare parts availability.

CE Compliance	The machine is equipped with mechanical and electrical safety measures in accordance with CE directives.
Max. Product Dimensions	Width: 500 mm, Length: 500, Height: 300 mm
Max. Speed	12 packs/minute
Packaging Material	Polyethylene (PE) 35–100 microns
Max. Roll Width	700 mm
Air Pressure	6 Bar
Voltage	380V, 50/60Hz
